

## *Evolution by Intention<sup>™</sup>*

In order to progress beyond historical notions of evolution through incremental change, to one of *Evolution by Intention* we must first:

- redefine who we are as human beings and how we experience our humanity
- rediscover and reclaim what has always been there, reawakening to our existing genius and potential to shape our world

**Who we must continue to become:**

- Leaders of global transformation
- An opportunity to engage life differently through:
  - a call to women to lead and co-create with men differently
  - an invitation for men to relax into new ways of being
- A 'wave' or 'movement' for creating living, organic collectives that thrive on the uniqueness of the individual and his/her impact when choosing to 'Engage!'
- A living model for manifestation of a future based on standing in the moment, looking into the future and creating by intention

**How we must choose:**

We make the choices that will move us toward our declared intention and to not make choices that will simply move us away from our fears.

**Our declared beliefs/values/attitudes:**

- ★ History (the past) is irrelevant as a guide to creating the future
- ★ I live in a holographic universe
- ★ I am a Quantum Biological Human
- ★ Growth is a biological imperative
- ★ I am critical to making a difference
- ★ It's not too late
- ★ I am up to the challenge
- ★ There is an urgency to engage
- ★ If not me, then who?
- ★ This is fun, exciting and adventurous: I don't have to do serious things, seriously
- ★ I am the godforce expressing in a physical universe
- ★ My world is a safe and abundant place
- ★ My confusion is a gateway/portal to my own evolution
- ★ I am not alone
- ★ My 'reality' is malleable based on my expectations
- ★ What you think of me is none of my business
- ★ Every response is an intelligent response: there are no exceptions!
- ★ Your judgments of me are reflections of your internal landscapes
- ★ When I engage, a difference occurs
- ★ My power is in the size and courage of my questions
